

WELCOME TO ELLANN[®]

Welcome to ELLANN[®]! As a renowned INUS[®] partner, we are proud to offer you the INUSphere[®] treatment in the vibrant metropolis of Berlin, right on Leipziger Platz. As a partner practice of ELLER KELLERMANN[®], ELLANN[®] represents evidence-based detoxification methods and therapies with a broad diagnostic and therapeutic spectrum for the treatment of chronic, inflammatory and/or autoimmune diseases.

Onboarding and consulting

The information sheet that you are holding in your hands is intended to provide you with initial orientation and to clarify the most important questions that may arise in the course of your onboarding. It represents the first stage of our comprehensive consultation process, during which we will support you at all times.

About the INUSphere[®] treatment

INUSphere[®] is a double-membrane filtration apheresis. The procedure has been established as a treatment method in medicine worldwide for 25 years. With INUSphere[®], specially adapted equipment is used along with a filter system adapted to your particular situation. The crucial point is that pathological factors are removed from the blood plasma by this special filter. The percentage of relief varies from individual to individual.

Treatment process

During the treatment, which lasts around 2-2.5 hours depending on the individual plasma volume, the blood must be temporarily diluted in order to achieve an optimal result. For this purpose, the drug Heparin[®] is added to the system at the beginning of INUSphere[®]. Thermoregulation ensures warming and optimization of blood flow. The volume is calculated precisely for you and ensures your optimal relief.

Safety and side effects

Despite the comparatively minor side effects that INUSphere[®] entails compared to other invasive procedures, we are fully aware of our responsibility towards you. Our goal is for you to feel safe and secure throughout the course of treatment. That is why each INUSphere[®] is personally administered and monitored by Dr. Kellermann. At ELLANN[®], we are proud to currently be the only center where INUSphere[®] procedures are carried out under the continuous supervision of an intensive care physician – because your safety is our top priority!

After the treatment

After the treatment, the needles are removed by a medical professional and bandages are applied to prevent bruising. If you have any allergies or intolerances, please let us know so that we can organize your treatment optimally.

Costs and contact information

The cost of each INUSphere[®] may vary slightly depending on personal circumstances. As a rule, it is advisable to carry out two treatments within a maximum period of 7 days. The optimal time between the two treatments is at least 48 hours. Two treatments are offered at ELLANN[®] as part of a package price. For around €5,500 you will receive two INUSphere[®] treatments and a personal consultation with Dr. med. Heinisch-Röchert, findings in digital form if available, and a 30-minute evaluation of findings.

If you have further questions or would like a personal meeting with our onboarding team, please contact us at kontakt@ellann-health.com or call us at +49 (0) 30 863 242 50. You can also use this number to make an appointment directly should you wish to have the treatment.

Best regards from your medical team,
Dr. med. Heinisch-Röchert, Dr. med. Kellermann

We look forward to caring for you!
